## MOTEO MARAE RESERVE MAARA KAI PROJECT

Progress Report

Dated 01 April, 2012

The above photographs represent BEFORE and CURRENT images showing our progress to far with our Maara Kai Project. Posts have been purchased along with some roof iron. They will both be used to surround and divide the garden plots.

The white outdoor tables will be used in the shade house for preparing and sewing seedlings and also used as storage.

Our next purchase will be shade cloth to enclose the shade house, then soil and manure once the boxing is completed.

The gardens will be used by Marae whanau, hapu and iwi, the local Kohanga Reo, hireage users of the Marae, as well as the small local Puketapu community.
